

QUAD RENOVATION

location: Oneonta, NY

owner: SUNY Oneonta

a green quad is the centerpiece of the design

Trowbridge & Wolf was the lead designer for the Quad Renovation Project at the State University of New York, College at Oneonta. The design is a response to a lack of a prime central space on its campus. Under-utilized walkways were eliminated to expand the green space on the quad, and plazas were introduced to provide interest and gathering space for events.

Trowbridge & Wolf inventoried the condition of existing trees and implemented a plan to re-green the quad. The landscape plantings were selected for tolerance of site drainage conditions.
