

CAYUGA GREEN: SIX MILE CREEK WALK

location: Ithaca, NY

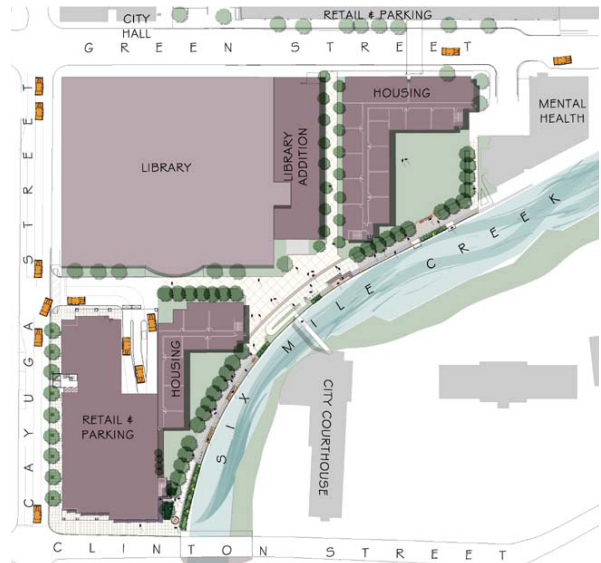

owner: City of Ithaca

The Cayuga Green development is a three-phase, mixed-use project in the center of the City of Ithaca. The project combines housing, retail space, professional offices, the public library, and a municipal parking garage. It is a mixed-use development situated on a new urban space, the Six Mile Creek Walk. The Creek Walk is a promenade that links the new facilities and several new urban plazas. It also provides connectivity to the street network as well as other trails in the city.

Trowbridge and Wolf prepared the overall redevelopment plan and developed detailed design and construction documents for the site work for three phases of implementation. TWLA was also responsible for the SEQR and site plan approvals.

The ground floor of the garage incorporates retail storefronts on Cayuga St.
